**SYLLABUS** 

### **Course overview**

Regions are the spatial expression of physical geography, as well as economic, social and political relations. The course provides knowledge on how the different regions (e.g., South America, Europe, the Middle East, Sub-Saharan Africa, and others) interact with the global context; on the diversity of their trajectories and their specific development patterns. It develops critical analysis of the relationship among the different regions and on the link between space and societies. More broadly, the course aims to develop critical thinking regarding the concepts of development, globalization, sustainable development and situated knowledge.

This course is a geographic approach to the world's regions current issues considering their social and economic practices, their historical and political specificities, their cultural identities and environmental landscapes. We will develop a critical analysis of those questions through the specific lens of the pandemics and the particular challenges it raises in each region.

Students will learn to use and analyze spatial data from maps, statistical tables, internet resources and press resources. They will have to follow world current debates and events and articulate them with the contents developed in class.

### **Course objectives and learning outcomes:**

By the end of the course you will be able to:

- 1. Understand the links among people, places and regions.
- Analyze the specificity of each world region and their relationship with each other using a wide variety of sources and material. Critically put in perspective those relationships regarding processes such as colonialism, globalization, development, environmental crisis and climate change.
- 3. Understand how the covid-19 crisis is articulated with these processes.
- 4. Engage critically with development patterns and projects emerging from the different regions as a response to those challenges. Compare them and understand their historical and epistemological grounds.
- 5. Identify how categories such as race, class, gender can impact those relationships specifically.
- Use fundamental geographical concepts (e.g. scale, place, space, region, borders) and methods (e.g. thematic maps, population pyramids, interactive digital maps) in order to develop your arguments.

#### **Email Policy**

I encourage you to email me with any questions about the class.

### **Grading**

Final grades for the course will be determined according to the following percentages:

# Participation in class (10%)

Class participation begins with regular connection to Blackboard. Zoom sessions will be organized twice a week for each chapter, according to the planned class. You will have to attend and engage in the discussions. Completion of the guizzes will be considered as class participation.

# Quizzes (30%)

There will be a short quiz by the end of each chapter. The quizzes will be multiple choice and will cover the material taught in each chapter. They will be accessible on Blackboard for an hour over a period of 48 hours.

### Assignments (30%)

There will be one group assignment every week. Assignments will be collective and will serve as a starting point for class discussion on the discussion board. The guidelines for each assignment will be available on Blackboard.

# Final Essay (30%)

Students will have to write one short essay as a midterm. The essay will be an analysis on one of the issues mentioned in class (500 to 700 words). Students will have to use knowledge from the class and other resources in order to develop articulated arguments. It will be the opportunity to evaluate their capacity to develop critical thinking on a specific topic. The essay will have to be turned in through Blackboard.

# Final feedback (Mandatory to validate the course but not graded)

Students will have to do a short critical analysis of the semester to validate the course.

There are no individual extensions for assignments, quizzes, or the final exam UNLESS in the case of a documented medical emergency. There will be no extra credit assignments given for this course.

### Policy on the Giving of IN as a Grade

No incompletes (IN) for this course are given unless there are exceptional and documented individual circumstances. If you miss an exam, you must provide a documented reason and make arrangements to
